

### ***Join Us at the Forefront of Wildlife Conservation Research***

***Position:*** Principal Investigator

***Project:*** Elephant Collective Behaviour

***Location:*** Samburu National Reserve, Northern Kenya

***Contract Term:*** 1 year, renewable

***Application Deadline:*** 30<sup>th</sup> May 2024

***Remuneration:*** \$50-\$70,000 per annum depending on experience

#### ***About Us:***

We are a leading research and conservation organization dedicated to advancing the understanding of elephant behaviour through innovative scientific methods. Our collaborative environment integrates a 30 year study of elephant lives based on individual recognition, with advanced technologies such as AI and drone videography. This offers a dynamic workspace for pioneering research and allied conservation efforts.

#### ***The Role:***

As the Principal Investigator for the Elephant Collective Behaviour Project, you will spearhead research initiatives using cutting-edge video analysis tools to study elephant group dynamics. This position involves working closely with our Long-Term Monitoring Team, skilled Drone Pilots, and a network of global researchers to deliver impactful scientific insights.

#### ***Responsibilities:***

- Develop and implement detailed work programs for the project.
- Manage field data collection, storage, and analysis in collaboration with our scientific and field teams.
- Provide regular updates and communicate findings through high-impact, peer-reviewed publications.

## SAVE THE ELEPHANTS

- Lead a diverse team, fostering an environment of creativity and rigorous scientific inquiry.

### ***Who You Are:***

- You hold a PhD or Master's degree in Behavioural Science or a related field.
- You have experience with video-based research and/or machine learning.
- Your academic career includes a track record of publications in peer-reviewed journals.
- You are adept at managing complex projects and can thrive under challenging field conditions.

### ***Why Join Us:***

- Work in the stunning Samburu National Reserve with accommodations in a well-equipped research camp.
- Enjoy a collaborative atmosphere with ample support and resources including dedicated drone technology.
- Competitive salary with comprehensive field support and 27 days of annual leave.
- Opportunities for career growth and ongoing professional development.

### ***Apply Now:***

Ready to make a significant impact in elephant conservation?
